1. INTRODUCTION

This document describes the contents of the Understanding America Study's (UAS) Component File, created at the University of Southern California (USC) by the Center for Economic and Social Research (CESR). Support for creating this data set is provided by the Social Security Administration (SSA) and the National Institute on Aging (NIA).

The UAS Component File (also referred to as simply the Component File) comprises data derived from online survey data collected by CESR through its UAS internet panel:

<https://uasdata.usc.edu/index.php> (for an overview of the UAS, please see the Introduction of the [UAS Comprehensive File Data Description](#)). The data in the current Component File have their source in the first two waves of the Comprehensive File studies (Wave 12 and Wave 13—the wave numbering structure will be explained in [Section 2.1](#)). The variables in the Component File can be divided into two groups: variables based on the income and wealth sections of the UAS version of the core Health and Retirement Study (HRS)¹ questionnaires, and a set of demographic and survey information items associated with every UAS survey in the Comprehensive File.

The income and wealth variables included are the components, that is, the individual amounts used to calculate the income and wealth summary variables found in the Comprehensive File. For example, looking at Wave 12, the Component File contains several sources of respondent earnings—such as income from wages, second jobs, tips, and professional practice—that are combined when calculating the total earnings summary variable (*r12iearn*) in the Comprehensive File.

A set of demographic and survey information items are included for each of the surveys contributing to the Comprehensive File, as well as two items (*inhrrs12* and *inhrrs13*) indicating participation in each UAS HRS wave. Some examples of these variables are marital status, level of education, and the date respondents began each UAS survey and the respondent completion date of each survey.

The Component File is intended as a supplement to the Comprehensive File. Early versions of the Component File only contained variables pertaining to the UAS HRS study. Starting in June 2020, it was expanded to include demographic and survey information variables for the other surveys that make up the Comprehensive File, referred to as the core “non-HRS” UAS surveys.

The variable naming structure in the Component File differs from the Comprehensive File, as it permits identification of each variable's UAS survey of origin. Details of this naming structure are located in [Section 3.1](#) of this document. A data document describing the variables in the Comprehensive File can be found [here](#).

¹ The core HRS refers to the questionnaires and survey that correspond to the HRS study administered by the University of Michigan.

The Component File can be easily linked with the Comprehensive File or with any individual UAS survey (described in [Section 2.5](#) below). An updated listing of all available UAS data sets is available on the [UAS All Surveys page](#). Both the Component and Comprehensive Files can be found [here](#). Please send all questions about the data sets or this data description to uas-l@mymaillists.usc.edu.

2. OVERVIEW OF THE UAS COMPONENT FILE

2.1 UAS Input Files

The majority of Component File variables are based on items collected in the My Household survey and in the sequence of surveys that make up the UAS HRS.

The My Household survey is administered quarterly to all UAS panel respondents. It queries respondent age, gender, ethnicity, marital status, state of residence, education, number of household members in the UAS, among other attributes. My Household data are included within every UAS survey's data set to provide a snapshot of respondents' demographic characteristics near the time when they completed each survey. The My Household survey completed closest in time before a given survey is linked with that survey and added to its data. Consequently, within the Component File, My Household data are always indexed to a specific UAS survey. These My Household variables were added to the Component File with variable names referencing the linked surveys (e.g., *r12_uas1gender* is the Component File variable name for the gender variable collected in the My Household survey that is indexed to UAS 1).

The UAS HRS is based on the 2014 (Wave 12) and 2016 (Wave 13) core HRS questionnaires. The waves are numbered 12 and 13 (instead of 1 and 2) to correspond to the wave-to-questionnaire mapping scheme used by the RAND HRS to facilitate familiarity for users who have previously worked with RAND HRS data. Since the questionnaires for this study are frequently lengthy, each wave of the UAS HRS is fielded over six separate UAS surveys (listed in Table 1) to reduce respondent burden. The section letters seen in Table 1 refer to the core HRS questionnaire sections.

The Component File also includes survey start dates, completion dates, and survey participation indicators flag from every survey within both the UAS HRS and within the nine other studies that contribute to the Comprehensive File. These remaining studies are referred to as the core non-HRS studies, and the surveys collecting data for them are referred to as the core non-HRS surveys. The first and second waves for each of the core non-HRS studies are numbered Wave 12 and Wave 13, respectively, to maintain consistency with the UAS HRS. These core non-HRS surveys and the corresponding their studies are also listed in Table 1. More information about the nine core non-HRS studies is found in the [Comprehensive File Data Description](#).

Table 1. Correspondence between UAS Component File Studies and UAS Surveys

UAS Study	UAS Surveys
UAS HRS	UAS 20 Sections A-D (Wave 12) UAS 21 Sections E-H (Wave 12) UAS 22 Sections J-M (Wave 12) UAS 23 Sections N-P (Wave 12) UAS 24 Sections Q-R (Wave 12) UAS 25 Sections S-W (Wave 12) UAS 95 Sections A-D (Wave 13) UAS 96 Sections E-H (Wave 13) UAS 97 Sections J-M (Wave 13) UAS 98 Sections N-P (Wave 13) UAS 99 Sections Q-R (Wave 13) UAS 100 Sections S-W (Wave 13)
Topic P: Financial Literacy; Personality; Understanding Probabilities; Numeracy	UAS 1 (Wave 12), UAS 121 (Wave 13)
Topic W: Satisfaction with life domains; well-being yesterday; neighborhood quality; comparison of incomes with others	UAS 2 (Wave 12) UAS 121 (Wave 13)
Topic K: What do people know about Social Security	UAS 16 (Wave 12) UAS 94 (Wave 13)
Topic F: Financial Services and Decision Making	UAS 18 (Wave 12) UAS 119 (Wave 13)
Topic I: Ways people get information on retirement and Social Security	UAS 26 & UAS 16 (Wave 12) UAS 113 (Wave 13)
Topic C: Subjective numeracy and Consumer Financial Well-being	UAS 38 (Wave 12) UAS 177 (Wave 13)
Topic N: Cognitive measures 1 – Numbers	UAS 42 (Wave 12) UAS 83 (Wave 13)
Topic V: Cognitive measures 2 – Picture Vocabulary	UAS 43 (Wave 12) UAS 84 (Wave 13)
Topic A: Cognitive measures 3 – Verbal Analogies	UAS 44 (Wave 12) UAS 85 (Wave 13)
My Household	My Household Survey (taken quarterly)

All data used to create the UAS Component File were downloaded from the UAS Survey Data Page on May 30th, 2020. Since some of these surveys are still in the field, response numbers have most likely changed since the creation of the file. Future releases of the UAS Component File will include updated data for each UAS survey containing new information since the previous Component File release.

2.2 UAS HRS Survey Sequence

Not every UAS panel member participated in each of the UAS HRS waves listed in Table 1. The UAS HRS Wave 13 surveys are administered as followup surveys to the UAS HRS Wave 12 surveys. Therefore, each respondent must have completed all Wave 12 surveys (UAS 20 through UAS 25) to be eligible to take the first Wave 13 survey (UAS 95).

Wave 12 respondents take UAS 20 through UAS 25 (UAS 95 through UAS 100 in Wave 13) sequentially with the exception that respondents take UAS 24 before UAS 23 (UAS 99 before UAS 98 in Wave 13). This is done because the content in surveys UAS 22 and UAS 24 in Wave 12 (and UAS 97 and UAS 99 in Wave 13) are similar in that both focus on employment and earnings from that employment. Since there can be a time lag between when a respondent finishes one UAS HRS survey and begins the next, it was decided to decrease that lag so that the employment status information given in UAS 22 (and UAS 97) has a higher likelihood of being current when the respondent answers questions about income in UAS 24 (and UAS 99).

The variables *inhrs12* and *inhrs13* are included in the Component File to indicate whether respondents have completed at least the first survey in each respective UAS HRS wave. A value of 1 indicates at least 1 UAS HRS survey in the particular wave has been completed, whereas a 0 indicates that the respondent has not yet completed any UAS HRS surveys in that wave.

2.3 UAS Component File Format

The UAS Component File is available for download [here](#) from the UAS website in STATA or CSV format. The file is organized at the respondent-level, which is uniquely identified by the variable, *uasid*. If you would like the data in a different format, such as SAS, please email your request to uas-l@mymaillists.usc.edu.

2.4 Obtaining UAS Data

The data described in this document are based on UAS public data release files. These files are accessible through the [UAS All Surveys page](#).

Before using the data, one must first obtain permission from the UAS by [registering on the UAS site](#) to download the public release files. By registering with UAS one agrees to the “Conditions of Use” governing access and use of the data.

2.5 Merging with other UAS Data Sets

Each UAS file can be merged with other files using the unique person identifier variable, *uasid*. *Uasid* is assigned to a respondent at recruitment into the UAS panel and stays fixed for each

survey taken. Please use *uasid* to merge the UAS Component File with the UAS Comprehensive Data File and any other UAS survey data set.

3. UAS COMPONENT FILE DESCRIPTION

The Component File can be classified into two segments:

- Demographic and survey information items for every UAS survey in the Comprehensive File
- The component measures from the income and wealth sections of the UAS HRS.

Each segment is described in this section, along with the variable naming structure for the Component File. In the Component File, variable name prefixes are determined by the wave, topic, and UAS survey from which the data originates. This structure differs from the Comprehensive File, in which variable name prefixes are determined only by the associated UAS wave or study.

3.1 Variable Naming Structure

The naming convention for all variables in the UAS Component File is similar to the one in the Comprehensive File except for one main difference (see Section 3.1.1 of the [Comprehensive File Data Description](#) for variable naming in the Comprehensive File). The difference being the Component File variable names contain in their prefix an underscore followed by the letters “uas” and the UAS survey (denoted with the unique UAS survey number) from which data were collected.

Table 2 demonstrates an example of this naming convention for the Component File variables containing Wave 12 marital status. The corresponding variable in the UAS Comprehensive File is simply *r12mstat*, which uses the individual UAS survey responses and timing information to consolidate the data into one variable.

Table 2. Naming Convention for Variables in the UAS Component File (Shown for Wave 12 Marital Status)

UAS Component File Variable	Corresponding UAS Survey
r12_uas20mstat	UAS 20
r12_uas21mstat	UAS 21
r12_uas22mstat	UAS 22
r12_uas23mstat	UAS 23
r12_uas24mstat	UAS 24
r12_uas25mstat	UAS 25
r12_uas1mstat	UAS 1
r12_uas2mstat	UAS 2
r12_uas16mstat	UAS 16
r12_uas18mstat	UAS 18
r12_uas26mstat	UAS 26
r12_uas38mstat	UAS 38
r12_uas42mstat	UAS 42
r12_uas43mstat	UAS 43
r12_uas44mstat	UAS 44

For the Component File's UAS HRS income and wealth variables, the character directly following the UAS survey identifier is always either an “a” for wealth assets, or an “i” for an income item. If the variable is an imputation flag variable, the next character is an “f”. For wealth asset ownership and income received variables, the next character is an “o”. Examples of this structure are presented in the following sections.

3.2 UAS HRS Income and Wealth Variables

The harmonized income and wealth components are the primary focus of the UAS Component File's income and wealth segment. In addition, the corresponding income and wealth summary variable amounts are also included in the Component File. This is done as a convenience for users of the file. For the same reason, income and wealth variables that do not have any components associated with them are also included in the Component File (e.g., value of stocks).

Income and wealth imputation flags are included in the Component File for each component variable. The meaning of their values is consistent with those in the Comprehensive File. Additionally, ownership flag variables are included in the Component File. These are binary 0/1 variables that indicate whether an income type was received and whether a wealth asset is owned. These ownership variables are only present in the Component File.

3.2.1 Income Variables

The income-related variables in the UAS Component File consist of the various income components and their associated summary variables. A list of all income variables is presented in [Appendix Table B.1](#). Next, we show the Wave 12 components included in the Component File that are not found in the Comprehensive File, and how each relates to its summary variable. For income items that have a respondent and spouse variable, the respondent version is shown as an example, though each is computed identically. The Wave 13 equivalent variables are also computed identically.

- **Respondent Earnings**
The summary variable for this income amount is *r12_uas24iearn*. It is the sum of four income components:
 1. Wages/salary – *r12_uas24iwage*
 2. Tips, bonuses, and commissions – *r12_uas24ibon*
 3. Second job earnings – *r12_uas24i2nd*
 4. Professional practice or trade earnings – *r12_uas24itrad*
- **Respondent Income from Employer Annuity**
The summary variable for respondent income from employer annuity is *r12_uas24iann*. Its value is the sum of three income components: *r12_uas24iann1*, *r12_uas24iann2*, and *r12_uas24iann3*. The variable *r12_uas24iann1* represents the income amount of the largest annuity, *r12_uas24iann2* represents income from the second largest annuity, and *r12_uas24iann3* is the income amount from any remaining annuities.
- **Respondent Income from Employer Pension**
The summary variable for respondent income from employer pension is *r12_uas24ipen*. Its value is the sum of three income components: *r12_uas24ipen1*, *r12_uas24ipen2*, and *r12_uas24ipen3*. The variable *r12_uas24ipen1* represents the income amount of the largest pension, *r12_uas24ipen2* represents income from the second largest pension, and *r12_uas24ipen3* is the amount of any income from any remaining pensions.
- **Household Capital Income**
The summary variable household capital income, *h12_uas24icap*, has a value that is the sum of several income component variables.
 1. Respondent and spouse self-employment income – *r12_uas24isemp* and *s12_uas24isemp*
 2. Business income – *h12_uas24ibusin*

3. Rental income – *h12_uas24irntin*
4. Dividend income – *h12_uas24idivin*
5. Certificate of Deposit income – *h12_uas24icdin*
6. Checking/Savings interest income – *h12_uas24ichkin*
7. Bonds income – *h12_uas24ibndin*
8. Household income amount from other savings/assets – *h12_uas24iothi1*

When calculating *h12_uas24icap*, special attention is paid to avoid double counting component amounts representing the same income, such as self-employment income that was included in the business income amount.

- All Other Household Income

This summary variable, *h12_uas24iothr*, is the value of the sum of the income components:

1. Any income not already mentioned – *h12_uas24iothi2*
2. Lump sum amount variables *h12_uas24iluyr1*, *h12_uas24iluyr2*, *h12_uas24iluyr3*.
Examples of the type of lump sum payments received are insurance settlements, pension settlements, inheritances, gifts, and lawsuits.

- Respondent Income from Other Government Transfers

The summary variable for respondent income from other government transfers is *r12_uas24igxfr*. Its value is the sum of the following income components:

1. Income from Veterans Benefits or Military Pension – *r12_uas24ivet*
2. Dollar value of food stamps/SNAP benefits received – *h12_uas24ifood*
3. Welfare income – *h12_uas24iwelf*

The values of *h12_uas24ifood* and *h12_uas24iwelf* that contribute to the total of *r12_uas24igxfr* depend on whether the respondent is married, and also who received the benefit (only respondent, only spouse, both).

- Respondent Income from Social Security Disability and SSI

The summary variable representing this amount is *r12_uas24issdi*. It is the sum of two separate social security benefit amounts:

1. Income from Social Security Disability (SSDI) – *r12_uas24isdi*
2. Supplemental Security Income (SSI) – *r12_uas24issi*

- Respondent Income from Unemployment and Worker's Compensation

The summary variable representing this amount is *r12_uas24ifunwc*. It is the value of the sum of income components:

1. Income from Unemployment – *r12_uas24iunem*
2. Income from Worker's Compensation – *r12_uas24ifwcmp*

- Respondent Income from Social Security Retirement

The variable representing the value of income from Social Security retirement is *r12_uas24isret*. It is calculated by multiplying the Social Security retirement monthly

amount variable, *r12_uas24mss*, and the number of months received variable, *r12_uas24nss*. Therefore, the value of *r12_uas24isret* represents the yearly amount received.

In addition to the Social Security retirement variable, *r12_uas24isret*, several other income variables have corresponding monthly amount and number of months received variables that are included in the Component File. There are also variables that represent whether the number of months a particular received benefit was reported or not. Table 3 indicates which yearly income variables have monthly variables associated with them.

Table 3. Wave 12 Income Variables Reported at the Monthly Amount²

Yearly Income Amount	Monthly Income Amount	Number of Months Received	Whether Number Months Reported
<i>r12_uas24isret</i>	<i>r12_uas24mss</i>	<i>r12_uas24nss</i>	<i>r12_uas24nfss</i>
<i>r12_uas24ipen1</i>	<i>r12_uas24mpen1</i>	<i>r12_uas24npen1</i>	<i>r12_uas24nfpen1</i>
<i>r12_uas24ipen2</i>	<i>r12_uas24mpen2</i>	<i>r12_uas24npen2</i>	<i>r12_uas24nfpen2</i>
<i>r12_uas24ipen3</i>	<i>r12_uas24mpen3</i>	<i>r12_uas24npen3</i>	<i>r12_uas24nfpen3</i>
<i>r12_uas24iann1</i>	<i>r12_uas24mann1</i>	<i>r12_uas24nann1</i>	<i>r12_uas24nfann1</i>
<i>r12_uas24iann2</i>	<i>r12_uas24mann2</i>	<i>r12_uas24nann2</i>	<i>r12_uas24nfann2</i>
<i>r12_uas24iann3</i>	<i>r12_uas24mann3</i>	<i>r12_uas24nann3</i>	<i>r12_uas24nfann3</i>
<i>r12_uas24ivet</i>	<i>r12_uas24mvet</i>	<i>r12_uas24nvet</i>	<i>r12_uas24nfvet</i>
<i>r12_uas24isdi</i>	<i>r12_uas24msdi</i>	<i>r12_uas24nsdi</i>	<i>r12_uas24nfsdi</i>
<i>h12_uas24issi</i>	<i>h12_uas24mssi</i>	<i>h12_uas24nssi</i>	<i>h12_uas24nfssi</i>
<i>h12_uas24ifood</i>	<i>h12_uas24mfood</i>	<i>h12_uas24nfood</i>	<i>h12_uas24nffood</i>

All income-related amount variables in the Component File have an imputation flag and “whether income type received” (also referred to as ownership) variables associated with them. The Wave 12 imputation flag variables have the prefix *r12_uas24if*, *s12_uas24if*, or *h12_uas24if* depending on the reporting source of the variable (respondent, spouse, or household). Similarly, the Wave 12 income received variables have the prefix *r12_uas24io*, *s12_uas24io*, or *h12_uas24io* (*r13_*, *s13_*, *h13_* for the equivalent Wave 13 variables).

The rest of the income variables included in the Component File can also be found in the Comprehensive File. These variables have the same name except for the difference in variable

² Each respondent-level variable (indicated by variable prefix “r”) in Table 3 has a spouse-level equivalent set of variables, as well as a Wave 13 respondent and spouse-level set of variables.

prefix naming structure. For example, the value of Wave 13 respondent earnings is *r13_uas99iearn* in the Component File and *r13iearn* in the Comprehensive File.

3.2.2 Wealth Variables

The wealth-related variables in the UAS Component File include components of several summary variables that are found in the UAS Comprehensive File. A list of all wealth variables is presented in [Appendix Table B.2](#). All wealth assets are reported at the household level. The wealth components described next are shown for Wave 12 as an example. Equivalent Wave 13 wealth components for each are found in the Component File. These wealth components are related to the following assets:

- Net value of all IRA/401K accounts
The summary variable for this wealth amount is *h12_uas24aira*. The components included in the Component File are *h12_uas24aira1*, *h12_uas24aira2*, and *h12_uas24aira3*, which are summed to create the value of *h12_uas24aira*. The variable *h12_uas24aira1* is the amount of the largest IRA, *h12_uas24aira2* is the amount of the next largest IRA, and *h12_uas24aira3* is the amount of all remaining IRAs.
- Net value of primary residence
The summary variable for the value of the primary residence is *h12_uas21ahous*. The components are *h12_uas21amobl* (the net value of primary residence if it is a mobile home), and *h12_uas21ahou1* (net value of primary residence if it is a house). Respondents may own a house or a mobile home as a primary residence or neither, but never both. Therefore, the value of *h12_uas21ahous* (and *h12ahous* in the Comprehensive File), is the value of the component the respondent owns or zero if neither is owned.
- Value of all mortgages on primary residence
The summary variable for the value of all mortgages on the primary residence is *h12_uas21amort* and its components are *h12_uas21amrt1* and *h12_uas21amrt2*, which correspond to the value of the first and second mortgages on the residence. The components *h12_uas21amrt1* and *h12_uas21amrt2* are summed to create *h12_uas21amort*.
- Value of all other home loans on primary residence
The summary variable for the value of all other home loans is *h12_uas21ahmln*. Its components are *h12_uas21aeqcd*, the value of a line of equity credit, and *h12_uas21aeqln*, the value of any other home loan on the primary residence. These components are summed to create the value of *h12_uas21ahmln*.

Like the income amounts, all wealth-related amount variables in the Component File have imputation flag and ownership variables associated with them. The prefix for the Wave 12 wealth imputation flag variables are *h12_uas21af* or *h12_uas24af* depending on which UAS

survey each originated. Likewise, the prefix for the wealth ownership variables is *h12_uas21ao* or *h12_uas24ao* (*h13_* for Wave 13 variables).

Exclusively to the Component File, the wealth asset of trusts is included. Its associated variables (for Wave 12) are *h12_uas24atrst*, *h12_uas24aotrst*, and *h12_uas24aftrst*, corresponding to the trust amount, ownership flag, and imputation flag, respectively.

The rest of the wealth variables included in the Component File can also be found in the Comprehensive File, after accounting for the difference in variable prefix naming structure. For example, the value of Wave 12 bonds is *h12_uas24abond* in the Component File and *h12abond* in the Comprehensive File.

3.3 Demographic and Survey Information Variables

The UAS Component File includes a large set of demographic and survey information variables (e.g., marital status, education level, state of residence, survey completion date, etc.), for each of the UAS HRS and core non-HRS surveys that contribute to the Comprehensive File. Individual UAS survey participation flags are also included, as well as UAS HRS wave-specific participation flags (which pertain to whether at least the first UAS HRS survey in a wave was completed). All of the data for the demographic variables were collected in one of the quarterly My Household surveys and linked to each survey as described in [Section 2.1](#). The survey information variables are the survey begin and end dates (which were collected from each individual UAS survey), the individual UAS survey completion flags, and the UAS HRS wave participation flags. A full list of demographic and survey information variables is presented in [Appendix A](#).

3.3.1 Demographic Variables

The demographic variables found in the Component File include respondents' age, gender, ethnicity, marital status, family structure, state of residence, education, marital status, employment characteristics, and household composition. A list of all demographic variables is presented in [Appendix A.1](#).

For some demographic variables, such as birth year, gender, race, US citizenship, and Hispanic origin, little variation in values is expected between separate surveys, although corrections and updates may sometimes occur.

A higher likelihood of survey-to-survey variation exists for variables such as respondent age, highest level of education attained, marital status, state of residence, labor status, and whether the respondent lives with a partner.

3.3.2 Survey Information Variables

The survey information variables in the Component File consist of a unique identifier of the household a UAS panel member belongs to in a given survey (*rWV_uasXsurvhid*). Detailed information for this variable can be found on the [UAS standard variables page](#).

Also included are the survey-specific begin (*rWV_uasXiwbeg*) and end (*rWV_uasXiwend*) dates, together referred to as “timestamp” variables, which are generated by each individual survey. They represent the month, day, and year each respondent started taking and when completed a specific UAS survey. For completed surveys, timestamp variables have values of the form: DD-Month-YY. All data associated with incomplete surveys is imputed to equal “.z”, which indicates the respondent either never began the survey, or began but did not complete it.

Finally, there are variables flagging individual UAS survey completion as well as UAS HRS wave participation. The survey completion flags *inuasX*³ represent whether the respondent completed the given survey. The UAS HRS wave participation flags *inhrsWV*⁴ represent whether the respondent completed at least the first of the six surveys within the given wave of UAS HRS.

A full list of these survey information variables is presented in [Appendix A.2](#).

³ The character "X" represents the UAS survey number.

⁴ The string "WV" represents the wave number (12 or 13).

APPENDIX A. DEMOGRAPHIC AND SURVEY INFORMATION VARIABLES

Table A.1 Demographic Variables in the Component File

Variable Name	Variable Label
r12_uas1agey_b	w12 uas1 MyHH respondent age at time of survey
r12_uas2agey_b	w12 uas2 MyHH respondent age at time of survey
r12_uas16agey_b	w12 uas16 MyHH respondent age at time of survey
r12_uas18agey_b	w12 uas18 MyHH respondent age at time of survey
r12_uas20agey_b	w12 uas20 MyHH respondent age at time of survey
r12_uas21agey_b	w12 uas21 MyHH respondent age at time of survey
r12_uas22agey_b	w12 uas22 MyHH respondent age at time of survey
r12_uas23agey_b	w12 uas23 MyHH respondent age at time of survey
r12_uas24agey_b	w12 uas24 MyHH respondent age at time of survey
r12_uas25agey_b	w12 uas25 MyHH respondent age at time of survey
r12_uas26agey_b	w12 uas26 MyHH respondent age at time of survey
r12_uas38agey_b	w12 uas38 MyHH respondent age at time of survey
r12_uas42agey_b	w12 uas42 MyHH respondent age at time of survey
r12_uas43agey_b	w12 uas43 MyHH respondent age at time of survey
r12_uas44agey_b	w12 uas44 MyHH respondent age at time of survey

Table A.2 Survey Information Variables in the Component File

Variable Name	Variable Label
uasid	individual identifier
inhrs12	Indicates whether R completed at least 1 UAS HRS Wave 12 survey
inhrs13	Indicates whether R completed at least 1 UAS HRS Wave 13 survey
inuas1	Indicates whether R completed UAS 1 survey
inuas2	Indicates whether R completed UAS 2 survey
inuas16	Indicates whether R completed UAS 16 survey
inuas18	Indicates whether R completed UAS 18 survey
inuas20	Indicates whether R completed UAS 20 survey
inuas21	Indicates whether R completed UAS 21 survey
inuas22	Indicates whether R completed UAS 22 survey
inuas23	Indicates whether R completed UAS 23 survey
inuas24	Indicates whether R completed UAS 24 survey
inuas25	Indicates whether R completed UAS 25 survey
inuas26	Indicates whether R completed UAS 26 survey
inuas38	Indicates whether R completed UAS 38 survey
inuas42	Indicates whether R completed UAS 42 survey
inuas43	Indicates whether R completed UAS 43 survey
inuas44	Indicates whether R completed UAS 44 survey
inuas83	Indicates whether R completed UAS 83 survey
inuas84	Indicates whether R completed UAS 84 survey
inuas85	Indicates whether R completed UAS 85 survey
inuas94	Indicates whether R completed UAS 94 survey
inuas95	Indicates whether R completed UAS 95 survey
inuas96	Indicates whether R completed UAS 96 survey
inuas97	Indicates whether R completed UAS 97 survey
inuas98	Indicates whether R completed UAS 98 survey
inuas99	Indicates whether R completed UAS 99 survey
inuas100	Indicates whether R completed UAS 100 survey

inuas113	Indicates whether R completed UAS 113 survey
inuas119	Indicates whether R completed UAS 119 survey
inuas121	Indicates whether R completed UAS 121 survey
inuas177	Indicates whether R completed UAS 177 survey
