1 INTRODUCTION

This UAS panel survey, titled “UAS105: 2017 Survey of Consumer Payment Choice”, asks respondents about their adoption and usage of payment methods. This survey is part of a study that took place during the fall of 2017. It focuses on how consumers buy goods and services and pay bills, using cash, bank accounts, and other means of payment. The survey covers numerous aspects of payment preference, from security, ease, and acceptance. Participants also filled out diary entries of daily spending in UAS 106. This survey is no longer in the field. Respondents were paid $20 to complete the survey. Consent for participation in this survey/diary project was obtained in UAS 104. Related surveys in this project are UAS 28, 29, 31, 34 (2015) and UAS 62-64 (2016).

1.1 Topics

This survey contains questions (among others) on the following topics: Consumer Behavior, Income, Savings, Wealth. A complete survey topic categorization for the UAS can be found here.

1.2 Experiments

This survey includes experiment(s) of the following type(s): Auxiliary Randomization. Please refer to explanatory comments in the Routing section for detailed information. A complete survey experiment categorization for the UAS can be found here.

1.3 Citation

Each publication, press release or other document that cites results from this survey must include an acknowledgment of UAS as the data source and a disclaimer such as, ‘The project described in this paper relies on data from survey(s) administered by the Understanding America Study, which is maintained by the Center for Economic and Social Research (CESR) at the University of Southern California. The content of this paper is solely the responsibility of the authors and does not necessarily represent the official views of USC or UAS.’ For any questions or more information about the UAS, contact Tania Gutsche, Project and Panel Manager, Center for Economic and Social Research, University of Southern California, at tgutsche@usc.edu.
2 SURVEY RESPONSE AND DATA

2.1 Sample selection and response rate

The sample selection for this survey was:

All active respondents who gave consent to participate in the Boston Federal Bank SCPC/Diary 2017 project in UAS104.

As such, this survey was made available to 3158 UAS participants. Of those 3158 participants, 3075 completed the survey and are counted as respondents. Of those who are not counted as respondents, 24 started the survey without completing and 59 did not start the survey. The overall response rate was 97.37%.

Note: We are unable to provide sample weights for a small number of UAS members (see the Sample weighting section below for details). If they completed the survey, these members are included in the data set with a weight of zero, but accounted for in the computation of total sample size and survey response rate. %.

The detailed survey response rate is as follows:

<table>
<thead>

<tr>
<td>Response rate</td>
</tr>
</tbody>
</table>

2.2 Timings

The survey took respondents an average of 33 minutes, and the full distribution of survey response times is available in the figure below. Times per question are available upon request.
2.3 Sample & Weighting

Weights are included in the data set for this survey. This survey dataset may contain respondents with a weight of zero. These respondents belong to a small group of UAS members for whom sample weights cannot be computed due to non-probability recruitment for special projects. Hence, while they are accounted for in the total number of survey respondents, they do not contribute to any statistics using sample weights. For more details on the UAS weighing procedures please refer to the UAS Weighting Procedures V1. Please contact UAS staff with any questions.
3 STANDARD VARIABLES

Each Understanding America Study data contains a series of standard variables, consisting of individual, household and sample identifiers, language indicator, time stamps and a rating by the respondent of how much he or she liked the survey:

- **uasid**: the identifier of the respondent. This identifier is assigned to a respondent at recruitment and stays with the respondent throughout each and every survey he/she participates in. When analyzing data from multiple surveys, the ‘uasid’ can be used to merge data sets.

- **uashhid**: the household identifier of the respondent. Every member is assigned a household identifier, stored in the variable ‘uashhid’. For the primary respondent this identifier equals his or her ‘uasid’. All other eligible members of the primary respondent’s household (everyone who is 18 or older in the household) who become UAS respondents receive the ‘uasid’ of the primary respondent as their household identifier. The identifier ‘uashhid’ remains constant over time for all respondents. Thus it is always possible to find the original UAS household of an UAS panel member (even after they, for example, have moved out to form another household).

- **survhhid**: uniquely identifies the household a UAS panel member belongs to in a given survey. For instance, if the primary respondent and his/her spouse are both UAS members at the time of a given survey, they both receive the same ‘survhhid’ identifier for that survey. If they subsequently split, they receive two different ‘survhhid’ in subsequent surveys. They, however, always share the same ‘uashhid’. The identifier ‘survhhid’ is set to missing (.) if no other household members are UAS panel members at the time of the survey. Since individuals can answer the same survey at different points in time (which can be relatively far apart if the survey is kept in the field for a prolonged time), it may be possible that, within the same data set, household members have different ‘survhhid’ reflecting different household compositions at the time they answered the survey. For instance, suppose that the primary respondent and his/her spouse are both UAS members. If the primary respondent answers the survey when he/she is living with the spouse, but the spouse answers the survey when the couple has split, they receive different ‘survhhid’. Hence, the variable ‘survhhid’ identifies household membership of UAS panel members, at the time the respondent answers the survey. Note: in the My Household survey ‘survhhid’ is set to unknown (.u) for respondents who last participated in the My Household survey prior to January 21, 2015.

- **uasmembers**: is the number of other household members who are also UAS panel members at the time of the survey. Since individuals can answer the same survey at different points in time (which can be relatively far apart if the survey is kept in the field for a prolonged time), it may be possible that, within the same data set, the primary respondent of a household has a value of ‘0’, whereas the second UAS household respondent has a value of ‘1’. Therefore ‘uasmembers’ should be interpreted as the
number of household and UAS panel members at the time the respondent answers the survey. Note: in the My Household survey ‘uasmembers’ is set to unknown (.u) for respondents who last participated in the My Household survey prior to January 21, 2015.

- **sampletype**: indicates the sampling frame from which the household of the respondent was recruited. All UAS recruitment is done through address based sampling (ABS) in which samples are acquired based on postal records. Currently, the variable ‘sampletype’ takes on three values reflecting three distinct recruitment categories (in future data sets the number of categories may increase due to the incorporation of new recruitment categories):
  1. Nationally Representative Sample
  2. Native Americans: recruited through ABS, where the probability of drawing a zip-code is a function of the percentage of Native Americans in the zip-code. Primary respondents in these zip-codes who are not Native Americans are not invited to join the UAS.
  3. LA County: recruited through ABS drawing from zip-codes in Los Angeles County.

- **batch**: indicates the batch from which the respondent was recruited. There are currently the following values this variable takes (in future data sets the number of categories may increase due to the usage of new recruitment samples):
  2. ASDE 2014/01 Native Am.
  3. ASDE 2014/11 Native Am.
  4. LA County 2015/05 List Sample
  12. MSG 2016/05 Nat.Rep. Batch 8
  13. MSG 2016/08 LA County Batch 2
  14. MSG 2017/03 LA County Batch 3
  15. MSG 2017/11 California Batch 1
  16. MSG 2018/02 California Batch 2
18. MSG 2019/04 LA County Batch 4
19. MSG 2019/05 LA County Batch 5

- **primary respondent**: indicates if the respondent was the first person within the household (i.e. to become a member or whether s/he was added as a subsequent member. A household in this regard is broadly defined as anyone living together with the primary respondent. That is, a household comprises individuals who live together, e.g. as part of a family relationship (like a spouse/child/parent) or in context of some other relationship (like a roommate or tenant).

- **hardware**: indicates whether the respondent ever received hardware or not. Note: this variable should not be used to determine whether a respondent received hardware at a given point in time and/or whether s/he used the hardware to participate in a survey. Rather, it indicates whether hardware was ever provided:
  1. None
  2. Tablet (includes Internet)

- **language**: the language in which the survey was conducted. This variable takes a value of 1 for English and a value of 2 for Spanish.

- **start_date** (**start_year**, **start_month**, **start_day**, **start_hour**, **start_min**, **start_sec**): indicates the time at which the respondent started the survey.

- **end_date** (**end_year**, **end_month**, **end_day**, **end_hour**, **end_min**, **end_sec**): indicates the time at which the respondent completed the survey.

- **cs.001**: indicates how interesting the respondent found the survey.
4 BACKGROUND DEMOGRAPHICS

Every UAS survey data set includes demographic variables, which provide background information about the respondent and his/her household. Demographic information such as age, ethnicity, education, marital status, work status, state of residence, family structure is elicited every quarter through the “My Household” survey. The demographic variables provided with each survey are taken from the most recent ‘MyHousehold’ survey answered by the respondent. If at the time of a survey, the information in “My Household” is more than three months old, a respondent is required to check and update his or her information before being able to take the survey.

The following variables are available in each survey data set:

- **gender**: the gender of the respondent.
- **dateofbirth_year**: the year of birth of the respondent.
- **age**: the age of the respondent at the start of the survey.
- **agerange**: if the respondent’s age cannot be calculate due to missing information, ‘agerange’ indicates the approximate age. Should a value for both the ‘age’ and ‘agerange’ be present, then ‘age’ takes precedence over ‘agerange’.
- **citizenus**: indicates whether the respondent is a U.S. citizen.
- **bornus**: indicates whether the respondent was born in the U.S.
- **stateborn**: indicates the state in which the respondent was born. This is set to missing (.) if the respondent was not born in the U.S.
- **countryborn**: indicates the country in which the respondent was born. This is set to missing (.) if the respondent was born in the U.S.
- **countryborn_other**: indicates the country of birth if that country is not on the drop down list of countries shown to the respondent’.
- **statereside**: the state in which the respondent is living.
- **immigration_status**: indicates whether the respondent is an immigrant. It takes one of the following values: 0 Non-immigrant, 1 First generation immigrant (immigrant who migrated to the U.S), 2 Second generation immigrant (U.S.-born children of at least one foreign-born parent), 3 Third generation immigrant (U.S.-born children of at least one U.S.-born parent, where at least one grandparent is foreign-born), or 4 Unknown immigrant status.
- **maritalstatus**: the marital status of the respondent.
- **livewithpartner**: indicates whether the respondent lives with a partner.
- **education**: the highest level of education attained by the respondent.
- **hisplatino**: indicates whether the respondent identifies him or herself as being Hispanic or Latino. This variable is asked separately from race.
- **hisplatinogroup**: indicates which Hispanic or Latino group a respondent identifies him or herself with. This is set to missing (.) if the respondent does not identify him or herself as being Hispanic or Latino.
- **white**: indicates whether the respondent identifies him or herself as white (Caucasian).
- **black**: indicates whether the respondent identifies him or herself as black (African-American).
- **nativeamer**: indicates whether the respondent identifies him or herself as Native American (American Indian or Alaska Native).
- **asian**: indicates whether the respondent identifies him or herself as Asian (Asian-American).
- **pacific**: indicates whether the respondent identifies him or herself as Native Hawaiian or Other Pacific Islander.
- **race**: indicates the race of the respondent as singular (e.g., ‘1 White’ or ‘2 Black’) or as mixed (in case the respondent identifies with two or more races). The value ‘6 Mixed’ that the respondent answered ‘Yes’ to at least two of the single race categories. This variable is generated based on the values of the different race variables (white, black, nativeamer, asian, pacific). This composite measure is not conditional on hisplatino, so an individual may identify as Hispanic or Latino, and also as a member of one or more racial groups.
- **working**: indicates whether the respondent is working for pay.
- **sick leave**: indicates whether the respondent is not working because sick or on leave.
- **unemplayoff**: indicates whether the respondent is unemployed or on lay off.
- **unempllook**: indicates whether the respondent is unemployed and looking for a job.
- **retired**: indicates whether the respondent is retired.
- **disabled**: indicates whether the respondent has a disability.
- **lf_other**: specifies other labor force status.
- **laborstatus**: indicates the labor force status of the respondent as singular (e.g., ‘1 Working for pay’ or ‘2 On sick or other leave’) or as mixed (in case the respondent selects two or more labor statuses). The value ‘8 Mixed’ indicates that the respondent answered ‘Yes’ to at least two of the single labor force status variables. This variable is generated based on the values of the different labor status variables (working, sickleave, unemplayoff, unempllook, retired, disabled, lf_other).
- **employmenttype**: indicates the employment type of the respondent (employed by the government, by a private company, a nonprofit organization, or self-employed). This is set to missing (.) if the respondent is not currently working or currently on sick or other leave.

- **workfullpart**: indicates whether the respondent works full or part-time. This is set to missing (.) if the respondent is not currently working or currently on sick or other leave.

- **hourswork**: indicates the number of hours the respondent works per week. This is set to missing (.) if the respondent is not currently working or currently on sick or other leave.

- **hhincome**: is the total combined income of all members of the respondent’s household (living in their household) during the past 12 months.

- **anyhhmember**: indicates whether there were any members in the respondent’s household at the time he/she answered the survey as reported by the respondent.

- **hhmembernumber**: indicates the number of household members in the respondent’s household at the time of the survey as reported by the respondent. It may be that ‘anyhhmember’ is ‘Yes’, but ‘hhmembernumber’ is missing if the respondent did not provide the number of household members at the time of the survey.

- **hhmemberin_#**: indicates whether a household member is currently in the household as reported by the respondent. Household members are never removed from the stored household roster and their information is always included in survey data sets. The order of the roster is the same order in which household members were specified by the respondent in the ‘MyHousehold’ survey. The order is identified by the suffix _# (e.g., _1 indicates the first household member, _2 the second household member, etc.).

As an example, if the first household member is in the household at the time of the survey, ‘hhmemberin_1’ is set to ‘1 HH Member 1 is in the HH’; if he/she has moved out, ‘hhmemberin_1’ is set to ‘0 HH member 1 is no longer in the HH’. Since information of other household members (stored in the variables listed below) is always included in survey data sets, information about ‘hhmemberin_1’ is available whether this person is still in the household or has moved out.

- **hhmembergen_#**: indicates the gender of another household member as reported by the respondent.

- **hhmemberage_#**: indicates the age of another household member. The age is derived from the month and year of birth of the household member as reported by the respondent.

- **hhmemberrel_#**: indicates the relationship of the respondent to the other household member as reported by the respondent.
- **hhmemberuasid** is the ‘uasid’ of the other household member if this person is also a UAS panel member. It is set to missing (.) if this person is not a UAS panel member at the time of the survey. Since this identifier is directly reported by the respondent (chosen from a preloaded list), it may differ from the actual (correct) ‘uasid’ of the UAS member it refers to because of reporting error. Also, this variable should not be used to identify UAS members in a given household at the time of the survey. This is because the variables ‘hhmemberuasid’ are taken from the most recent ‘My Household’ and changes in household composition involving UAS members may have occurred between the time of the respondent answered ‘My Household’ and the time the respondent answers the survey. To follow UAS members of a given household, it is advised to use the identifiers ‘uashhid’ and ‘survhhid’.

- **lastmyhh_date**: the date on which the demographics variables were collected through the ‘My Household’ survey.
5  MISSING DATA CONVENTIONS

Data files provide so-called clean data, that is, answers given to questions that are not applicable anymore at survey completion (for example because a respondent went back in the survey and skipped over a previously answered question) are treated as if the questions were never asked. In the data files all questions that were asked, but not answered by the respondent are marked with (.e). All questions never seen by the respondent (or any dirty data) are marked with (.a). The latter may mean that a respondent did not view the question because s/he skipped over it; or alternatively that s/he never reached that question in the survey due to a survey break off.

If a respondent did not complete a survey, the variables representing survey end date and time are marked with (.c). Household member variables are marked with (.m) if the respondent has less household members (e.g. if the number of household members is 2, any variables for household member 3 and up are marked with (.m).

UAS provides data in STATA and CSV format. Stata data sets come with include variable labels that are not available in the CSV files. Value labels are provided for single-response answer option. In STATA these labels will include the labels ‘Not asked’ and ‘Not answered’ for (.a) and (.e), and will show in tabulations such as ‘tab q1, missing’. For multiple-response questions a binary variable is created for each answer option indicating whether the option was selected or not. A summary variable is also provided in string format reflecting which options were selected and in which order. For example, if a question asked about favorite animals with options cat, dog, and horse, then if a respondent selected horse and then cat, the binary variables for horse and cat will be set to yes, while the overall variable would have a string value of ‘3-1’. If no answer was given, all binary variables and the summary variable will be marked with ‘.e’.

Questions that are asked multiple times are often implemented as so-called array questions. Supposing the name of such question was Q1 and it was asked in 6 different instances, your data set would contain the variables Q1_1 to Q1_6. To illustrate, if a survey asked the names of all children, then child_1 would contain the name of the first child the respondent named and so on.

More information about the UAS data can be found in the UAS Data Guide available on the UAS Data Pages web site.
6 ROUTING SYNTAX

The survey with routing presented in the next section includes all of the questions that make up this survey, the question answers when choices were provided, and the question routing. The routing includes descriptions of when questions are grouped, conditional logic that determines when questions are presented to the respondent, randomization of questions and answers, and fills of answers from one question to another.

If you are unfamiliar with conditional logic statements, they are typically formatted so that if the respondent fulfills some condition (e.g., they have a cellphone or a checking account), then they are presented with some other question or the value of some variable is changed. If the respondent does not fulfill the condition (e.g., they are not a cellphone adopter or they do not have a checking account), something else happens such as skipping the next question or changing the variable to some other value. Some of the logic involved in the randomization of questions or answers being presented to the respondent is quite complex, and in these instances there is documentation to clarify the process being represented by the routing.

Because logic syntax standards vary, here is a brief introduction to our syntax standards. The syntax used in the conditional statements is as follows: '=' is equal to, '<' is less than, '>' is greater than, and '!=' is used for does not equal. When a variable is set to some number N, the statement looks like 'variable := N'.

The formatting of the questions and routing are designed to make it easier to interpret what is occurring at any given point in the survey. Question ID is the bold text at the top of a question block, followed by the question text and the answer selections. When a question or variable has associated data, the name links to the appropriate data page, so you can easily get directly to the data. Text color is used to indicate the routing: red is conditional logic, gold is question grouping, green is looping, and orange is used to document randomization and other complex conditional logic processes. The routing is written for a computer to parse rather than a human to read, so when the routing diverges significantly from what is displayed to the respondent, a screenshot of what the respondent saw is included.

The name of the randomization variables are defined in proximity to where they are put into play, and like the question ID the names of the randomization variables can be used to link directly to the associated data page.
Thank you for taking this survey. We are studying how consumers buy goods and services using cash and other ways to pay.

At any time in this survey, feel free to check your bank account or payment card records.

Click on any blue word to see its definition.

Try to answer all questions the best you can.

/* There are two aspects of the following questions that are randomized, the order of the six assessment characteristics (Security (1), Acceptance (2), Cost (3), Convenience (4), Getting setting up (5), and Payment Records (6)) and the order of the payment instrument groups. The payment instruments are randomized by the following three groups, and within each payment instrument group, there is no randomization:

1 Paper – Cash (a), Check (b), money order (h),
2 Card - Debit card (c), Credit card (d), Prepaid card (e), and
3 Electronic - Bank account number (f), Online banking bill pay (g).
*/

AS001_intro (intro in section Paymentmethods)
Please review these definitions of ways to pay.

textbf{Electronic payment instruments}
Bank account numberYou pay by giving your bank's number (sometimes called a "routing number") and your account number.Online banking bill payA payment made from your bank's online banking website or mobile app.

txtbf{Card payment instruments}
Debit cardYour payments are deducted from your bank account. Also, you can use a debit card to withdraw or deposit cash at ATMs.Credit cardYou pay back the credit card company
later. Credit cards charge interest. Prepaid card You store or load money on a prepaid card. Sometimes call "prepaid debit," "gift cards," "payroll cards," or "stored value cards."

**Paper payment instruments**
Cash Coins and paper bills. Check You write a paper check to a person or business. Money order You purchase a money order from a bank, post office, check-cashing store, or retail store. At the time of purchase, you specify the amount and the person or business to be paid.

In the questions that follow, please rate all payment methods, even if you do not use them.

LOOP FROM 1 TO 6

/* This process sets out the order of the instruments presented to the subject, based on which random group order variable is randomly assigned in FLAS003AddRandom above. This randomization of payment instrument group applies across all 6 assessment characteristic questions. For instance, if the order of the payment instrument groups is 3, 1, 2, then it will be that same order for all six assessment characteristics. The randomizer takes the following values:

1=1,2,3
2=1,3,2
3=2,1,3
4=2,3,1
*/
The groups themselves are as follows:

Group 1: AS003a, AS003b, AS003h
Group 2: AS003c, AS003d, AS003e
Group 3: AS003f, AS003g

These questions correspond to the following payment methods:

AS003a: Cash
AS003b: Check
AS003c: Debit card
AS003d: Credit card
AS003e: Prepaid card
AS003f: Bank account number
AS003g: Online banking bill pay
AS003h: Money order

The questions come in different instances demarcated by for example _1_. These suffixes indicate the payment method characteristic:

AS003a_1: Accepted. Answer options: 1 Rarely accepted, 2 Occasionally accepted, 3 Often accepted, 4 Usually accepted, 5 Almost always accepted
AS003a_2: Cost. Answer options: 1 Very high cost, 2 High cost, 3 Neither high nor low cost, 4 Low cost, 5 Very low cost
AS003a_3: Convenience. Answer options: 1 Very inconvenient, 2 Inconvenient, 3 Neither inconvenient nor convenient, 4 Convenient, 5 Very convenient
AS003a_4: Security. Answer options: 1 Very risky, 2 Risky, 3 Neither risky nor secure, 4 Secure, 5 Very secure
AS003a_5: Setting up. Answer options: 1 Very hard to get or set up, 2 Hard to get or set up, 3 Neither hard nor easy, 4 Easy to get or set up, 5 Very easy to get or set up
AS003a_6: Quality of records. Answer options: 1 Very poor records, 2 Poor records, 3 Neither good nor poor, 4 Good records, 5 Very good records

GROUP OF QUESTIONS PRESENTED ON THE SAME SCREEN

PA001_intro (HOW MANY BANK ACCOUNTS INTRO in section Paymentadoption)

Checking and Savings Accounts

Now we’re going to ask you about your checking and savings accounts. When answering the questions, please keep the following in mind:

If you are married or living with a partner, please report only your accounts. Do not
include accounts held......only by your spouse or partner...for business purposes only
...at non-bank online payment services such as PayPalEnter "0" if you have no accounts
of the indicated type.
How many accounts do you have at any banks, credit unions, brokerages, or investment
firms?

SUBGROUP OF QUESTIONS

PA001.a (HOW MANY BANK ACCOUNTS CHECKING in section Paymentadoption)
Number of (checking accounts-Allow you to make payments or withdrawals as often as
necessary using checks, debit or ATM cards, or online payments. Some checking ac-
counts pay interest on deposits and may be called money market checking accounts.): RANG 0..100

PA001.b (HOW MANY BANK ACCOUNTS SAVINGS in section Paymentadop-
tion)
Number of (savings accounts-A type of deposit account held at a bank or other financial
institution that pays interest and may require a minimum balance. Unlike a checking
account, it limits the number of withdrawals or payments you can make each month.):  
Include only traditional accounts (passbook or statement), money market accounts (but
not other mutual funds),
education accounts (Coverdell or 529), and Christmas Clubs or other account desig-
nated for saving purpose (e.g., vacation). 
RANGE 0..100

1 Yes
2 No

PA909 (ever have store branded card linked to bank account in section Paymentadoption)
(A store-branded card linked to your bank account allows you to deduct money from your bank account to pay for your purchases. To sign up for the card, you provide your bank account number. Store-branded cards are not issued by your bank. Stores or gas stations that issue store-branded cards include Target, Cumberland Farms, Speedway, Nordstrom, Royal Farms, Flash Floods, Fastrac Markets, Pride Stores, and Shell.) Have you ever had a store-branded card linked to your bank account?
1 Yes
2 No
Telephone banking is when you access your account by calling a phone number that your bank has provided. You interact with the system using either voice commands, your phone’s numeric keypad, or speaking with a live customer service representative.

To set up access to telephone banking, you may need to create a password or PIN.

Have you ever set up access to telephone banking?
1 Yes
2 No

Online banking is a method of accessing a bank account via the website of a bank, to perform such actions as viewing account balances, making transfers between accounts, or paying bills electronically.

In order to set up access to your bank’s online banking website, you usually have to set up a username, password, site key, or PIN.

Have you ever set up access to online banking?
1 Yes
2 No

IF NEWOB = YES THEN

You can use your bank’s website to make electronic payments from your bank account to a merchant, company, government, or private individual.

To do so, you would need to set up online bill pay by entering the name, address, and account number of the company or person to whom you are paying a bill.

Have you ever set up online bill pay at your bank’s website?
1 Yes
2 No

Next, please answer some questions about how often you make payments.

If you are married or living with a partner, please report all payments made...... by you... jointly with your spouse or partner. Do not include payments made...... only by your spouse or partner... for business purposes only. Feel free to check your records.

The next set of questions will be divided into several types of payments:

Categorize each payment you make into one of the categories below. We’ll ask you about each type of payment next.
BILLS & RELATED PAYMENTS
Automatic bill payments
Bill payments that are set up to occur on a regular schedule.
Online bill payments
Bill payments made online, but not paid automatically.
Bill payments by mail, in person, or by phone
Bill payments that you mail in, pay in person, or call in on your phone.

PURCHASES OF GOODS & SERVICES
Online payments
Payments for items bought online or donations made online.
Retail purchases of goods
Purchases of goods bought in person at stores.
Services
Purchases of services bought in person, such as food at restaurants, tolls, doctor’s visits, childcare, haircuts, education, and entertainment.
Person-to-person payments
Payments to friends and family, gifts, and casual payments like payments to babysitters and lawn mowers.

IF ABPADOPTER = 1 THEN
GROUP OF QUESTIONS PRESENTED ON THE SAME SCREEN

PU002_intro2 (Section Paymentuse)
Automatic Bill Payments

In a typical period (week, month, or year), how many automatic bill payments do you make?

Choose one box per row that best describes your typical activity. Answer for each payment method. Enter the number of times you make an automatic bill payment. DO NOT ENTER DOLLAR AMOUNTS. Answer on an annual basis if you typically make less than one payment per month. If you do not use the payment method, enter 0 (zero) in any box in the appropriate row.

GROUP OF QUESTIONS PRESENTED ON THE SAME SCREEN
Online Bill Payments

In a typical period (week, month, or year), how many online bill payments do you make?

IMPORTANT: Do not count any automatic recurring bill payments that you reported in the previous question. Choose one box per row that best describes your typical activity. Answer for each payment method. Enter the number of times you make an online bill payment. DO NOT ENTER DOLLAR AMOUNTS. Answer on an annual basis if you typically make less than one payment per month. If you do not use the payment method, enter 0 (zero) in any box in the appropriate row.

Figure 10: Respondent being asked to indicate number of retail transactions by listed
payment method per week, per month or per year
Retail services

In a typical period (week, month, or year), how many payments for services do you make?

Examples of services paid for while shopping or paying in person include:

Restaurants, bars, fast food and beverage
Transportation and tolls
Medical, dental, and fitness
Education and child care
Personal care (e.g. hair)
Recreation, entertainment, and travel
Maintenance and repairs
Other professional services (business, legal, etc.)
Charitable donations

Choose one box per row that best describes your typical activity. Answer for each payment method. Enter the number of times you make a payment. DO NOT ENTER DOLLAR AMOUNTS. Answer on an annual basis if you typically make less than one
payment per month. If you do not use the payment method, enter 0 (zero) in any box in the appropriate row.
