**Coronavirus Tracking Survey  
Methodology and Selected Topline Results**

**UAS 346 – Wave 28  
May 12 – June 22, 2021**

**July 13, 2021 Release**

## Methodology

On April 1, 2020, USC's Center for Economic and Social Research (CESR) invited all active members of CESR's Understanding America Study (UAS 266) probability-based internet panel to participate in an ongoing coronavirus tracking survey.

This methodology and topline is associated with participants in Wave 28 of the tracking survey, administered from May 12 through June 22, 2021.

## Sample Information

A total of 5,964 adult residents of the U.S. participated in this wave and are included in the final UAS 346 data file. Margin of sampling error for the full sample is +/-1.

A total of 8,463 panel members were eligible to be included in the weighted sample, resulting in a participation rate of 71% for this wave. The sample includes 176 who started but did not complete the survey.

Panel members included in the raw data (available upon request) but excluded from the weighted sample files were recruited via listed sample for a specific project and are not included in the topline estimates, or in the associated data files.

Specific sample sizes and sampling error information for subsamples are provided in the topline and crosstab tables. Sampling error calculations are at the 95% confidence level. Factors other than sampling error may affect results of any survey, including question wording, question order, mode, sample type, population coverage, and impact of current events.

## Tracking Survey Design

Beginning with wave 25 (UAS340) in February 2021, the tracking survey has used a 4-week cadence. Each panel member is randomized to respond on a pre-assigned day of the week, distributed so that our full sample is invited to participate over a 28-day period. Respondents have 14 days to complete the survey but receive an extra \$1 incentive for completing the survey on their assigned day. Most respondents participated on their assigned day of the wave, and earned the bonus incentive. The rest of the sample completed the survey after their assigned day but within their allotted 14-day window. Data for the full sample is thus not final until the end of 6-weeks, in this case May 25, 2021. Microdata files – individual wave files, and the updated longitudinal file - are released after each full wave is final.

Los Angeles County residents are invited to participate twice a month, alternating between a long form survey which is administered to everyone across the country every four weeks, and a short-form survey administered only to LA County residents every two weeks. For the subset of long form and short form survey questions that are identical, data for the full LA County sample is final after a two-week period, as LA County residents are given a week to respond to each survey.

Interactive graphic results: The survey design allows us to provide daily updates to graphs on our tracking survey website [Covid19Pulse.usc.edu](https://Covid19Pulse.usc.edu). These are refreshed just after 3am PST every day of the week. On the site, the viewer can choose to view aggregated results from our national sample, and from our California and Los Angeles County sub-samples. The graphs may be run for overall results, or among categories of age, race/ethnicity, gender, education, and income, when sample size allows. We provide the aggregated data used to create the graphics in csv format, and the graphics files themselves are downloadable in several formats.

Survey questionnaires, topline, microdata files, and a press room are available on our UAS Covid19 data site at [uasdata.usc.edu/page/Covid-19+Home](https://uasdata.usc.edu/page/Covid-19+Home)

## Questionnaire

Survey wording and question text are provided in this topline release, but for full wording including context, please refer to the associated codebook and questionnaire. For most questions, we rotated the order of response options, and/or questions to average out order effects. Respondents participated via computer, mobile device or tablet, at any time of day or night during the field period. The survey was conducted in the respondents' choice of English or Spanish.

Topline reports, codebook, and questionnaires associated with this release are available without need for registration at <https://uasdata.usc.edu/page/COVID-19+Corona+Virus>.

## Weights

The method for creating sample weights for the tracking survey follows the general procedure for UAS surveys described in [CESR's online methodology documentation](#). Sample weights are constructed in two steps. First, we calculate a base weight that corrects for unequal probabilities of selection of different households into the UAS. Second, we generate post-stratification weights, which align sample distributions of key demographics, namely gender, race/ethnicity, age, education, and geographic location, with their population counterparts. Population benchmarks are derived from the Basic Monthly Current Population Survey (CPS). The provided sample weights bring the sample in line with the U.S. adult population, if the entire sample is used. The sample weights also provide alignment with the population of Los Angeles County residents, California residents excluding Los Angeles County, and U.S. excluding California, if these geographic sub-samples are selected.

## About the Understanding America Study Internet Panel

The Understanding America Study (UAS) is an ongoing national research panel that started in 2014. We recruit panel members in waves from Marketing Systems Group frames of all household addresses in the United States. To ensure full coverage of the U.S. population, we provide internet-connected tablets to households that were not already online. Our panel includes U.S. residents who have cell phones, landlines, or no phone at all. It also includes a small number of respondents recruited from a listed sample, these participants are not included in weighted samples. Panel members are compensated for their participation.

For more information about the UAS panel, including weighting details; panel sampling procedures; recruitment protocols, survey and recruitment response rates; panel attrition rates; panel management protocols; and microdata files (including nonresponse and paradata), please visit the Understanding America Study panel website at <https://UASdata.usc.edu>.

## About the Center for Economic and Social Research

The Center for Economic and Social Research (CESR), part of the USC Dornsife College of Letters, Arts and Sciences, conducts basic and applied research in economics, psychology, demography, education, and sociology. The center's name signifies the breadth of the research, which encompasses numerous disciplines, topics and methodologies. The Center's multi-disciplinary philosophy fosters a productive and innovative research environment focused on understanding and informing important societal issues.

## Survey Team

**Arie Kapteyn** Ph.D., is Professor of Economics and the Executive Director of the Dornsife College of Letters Arts and Sciences Center for Economic and Social Research at the University of Southern California.

**Daniel Bennett** Ph.D., is Assistant Professor (Research) of Economics at the Dornsife College of Letters Arts and Sciences Center for Economic and Social Research at the University of Southern California.

**Kyla Thomas** Ph.D., is a Sociologist at the Dornsife College of Letters Arts and Sciences Center for Economic and Social Research (CESR) at the University of Southern California.

**Jill E Darling**, MSHS, is Survey Director for the Understanding America Study at the Center for Economic and Social Research at the University of Southern California.

For questions about this survey, please contact [uas-l@usc.edu](mailto:uas-l@usc.edu)

The USC Dornsife Center for Economic and Social Research is a proud member of the American Association for Public Opinion Research's [Transparency Initiative](#). The survey was funded by the USC Dornsife College of Arts, Letters and Sciences, the Bill & Melinda Gates Foundation, and many other donors.

## Topline Report

**Survey dates** May 12 to June 22, 2021  
**Sample size** 5,964 Adult U.S. Residents

This report provides the sample characteristics for the UAS 346 weighted national sample, as well as brief summaries of responses to the questions included in the data file. Full questionnaires, longitudinal and single data files, and other survey and panel information are available at [UASdata.usc.edu](https://UASdata.usc.edu).

## National Sample Characteristics

The table below summarizes select characteristics of the full National sample, with and without survey weights.

	National unweighted	National weighted
Male	41%	48%
Age(18-34)	16%	23%
Age(35-54)	37%	38%
Age(55-64)	21%	17%
Age(65+)	26%	22%
Low education (HS or less)	20%	38%
Medium education (Some College)	36%	27%
High education (College degree)	44%	35%
HH income (\$0-24,999)	19%	22%
HH income (\$25,000-49,999)	21%	22%
HH income (\$50,000-74,999)	19%	20%
HH income (\$75,000 and above)	42%	36%
Non-Hispanic White	67%	62%
Non-Hispanic Black	7%	12%
Non-Hispanic Asian	5%	5%
Non-Hispanic Other	5%	4%
Hispanic/Latino	15%	17%

Please refer to the topline results reported in the attached document for question-specific sample sizes and margins of sampling error.

**Survey introduction:**

Thank you for agreeing to participate in our ongoing survey which focuses on the impact of the novel coronavirus (COVID-19). We will send you a reminder to check in once every fourteen days, on [day of the week], to let us know how the coronavirus epidemic is affecting you. Most of the questions in this survey were asked in previous surveys. Thank you for answering them accurately again, to ensure we always have the most updated information.

**1. COVID-19 Symptoms, Testing, and Medical Care****cr001: Have you experienced any of the following symptoms in the past 7 days?**

	<b>1 Yes</b>	<b>2 No</b>	<b>3 Unsure</b>	<b>Obs</b>	<b>MOSE</b>
cr001a: Fever or chills	1.8	97.6	0.6	5926	+/- 1
cr001b: Runny or stuffy nose	15.8	83.2	1.0	5933	+/- 1
cr001c: Chest congestion	3.9	95.4	0.7	5924	+/- 1
cr001d: cough	8.4	90.8	0.7	5926	+/- 1
cr001e: Sore throat	3.8	95.5	0.7	5923	+/- 1
cr001f: Sneezing	15.6	83.8	0.6	5928	+/- 1
cr001g: Muscle or body aches	13.2	86.0	0.8	5925	+/- 1
cr001h: Headaches	14.1	85.1	0.7	5929	+/- 1
cr001i: Fatigue or tiredness	18.4	80.7	0.9	5928	+/- 1
cr001j: Shortness of breath	5.8	93.4	0.8	5930	+/- 1
cr001k: Abdominal discomfort	6.0	93.2	0.8	5926	+/- 1
cr001l: Vomiting	1.3	98.1	0.6	5929	+/- 1
cr001m: Hair Loss	3.0	95.8	1.2	5930	+/- 1
cr001n: Dry skin	11.0	88.3	0.7	5929	+/- 1
cr001o: Body temperature higher than 100.4 F or 38.0 C	0.5	98.7	0.8	5924	+/- 1
cr001p: Diarrhea	5.2	94.2	0.7	5925	+/- 1
cr001q: Lost sense of smell	1.4	97.7	1.0	5928	+/- 1
cr001r: Skin Rash	2.6	96.7	0.7	5926	+/- 1

**cr002: Have you been tested for coronavirus since [date of previous survey]? If so, what was the result?**

	<b>Tested Positive</b>	<b>Tested Negative</b>	<b>Tested Don't Know Result</b>	<b>Not Tested</b>	<b>Obs</b>	<b>MOSE</b>
cr002: Tested for COVID-19	0.8	11.9	0.3	87.0	5932	+/- 1

**cr079: [if cr002=1,2,3 (they have been tested)] How many times have you been tested since [DATE OF PREVIOUS SURVEY]?**

	<b>Mean</b>	<b>Obs</b>	<b>MOSE</b>
cr079: how many times tested	2.1	691	+/- 4

**cr080: [if cr079 > 1 time] What were the results?**

	<b>1 I only tested positive (I had the coronavirus)</b>	<b>2 I only tested negative (I did not have the coronavirus)</b>	<b>3 I tested both negative and positive</b>	<b>4 I do not know the results</b>	<b>Obs</b>	<b>MOSE</b>
cr080: test results	1.6	89.2	8.4	0.8	286	+/- 6

**cr005: Whether or not you have had a coronavirus test, has a doctor or another healthcare professional diagnosed you as having or probably having the coronavirus since [date of previous survey] ?**

	<b>1 Yes</b>	<b>2 No</b>	<b>3 Unsure</b>	<b>Obs</b>	<b>MOSE</b>
cr005: diagnosed with the coronavirus	0.6	98.6	0.8	5928	+/- 1

**cr007: [if cr002 != 1 AND cr005 !=1] Do you think you have been infected with the coronavirus since [date of previous survey] ?**

	<b>1 Yes</b>	<b>2 No</b>	<b>Obs</b>	<b>MOSE</b>
cr007: think infected with coronavirus	0.7	99.3	5887	+/- 1

**health\_insurance: Do you currently have health insurance?**
