Survey field dates November 4 – 15, 2020

## About the 2020 USC Dornsife Daybreak Post-Election Poll

The USC Dornsife Daybreak 2020 Tracking Poll and Post- Election Poll are the result of a collaboration between researchers in two USC research Centers: the Center for the Political Future and the Center for Economic and Social Research, both in the Dana and David Dornsife College of Letters, Arts and Sciences. Some of the questions in the tracking survey (social circle and state estimates) were developed in collaboration with researchers from the Santa Fe Institute and MIT.

The analysis associated with this release is based on the post-election poll (UAS 318), conducted from November 4 to 15, 2020 among 6,285 adult U.S. residents who are active members of CESR's Understanding America Study (UAS) probability-based internet panel. The poll includes 5,978 eligible voters, and 5,102 who voted in the presidential election. Other important subgroups include those who voted early by dropping off ballots (n=1,050) or filling them out at an early voting location (n=994), voted by mail (n=1,856), or voted on election day, either by dropping off a ballot, or filling one in at a voting location (n=1,280). The sample also includes 5,521 who participated in the tracking survey. The poll's margin of sampling error<sup>†</sup> is +/- 1 for all presidential election voters. Margins of sampling error for subgroups may be higher; these are provided in this crosstab release.

The poll took an average of 16 minutes to complete, and participants were paid a nominal fee for participation.

**Survey Weights and Participation Rate:** As 8,660 panel members were eligible to participate in this survey, the participation rate was 70%. We calculated weights in two stages: (1) base weights account for the probabilities of selection in our sampling procedures, and (2) post-stratification weights align survey distributions to CPS benchmarks and the election outcome. Weighting benchmarks were derived from the Current Population Survey Annual Social and Economic Supplement, as well as from vote estimates provided by the Associated Press and the Cook Report, as of Monday November 16, 2020. As votes are still being counted at the time of this release, final vote margin may be somewhat different. \*Due to the panel's sample design, unweighted subgroup sizes may not be representative of the weighted proportion in our variable estimates. For more information visit [UASData.USC.edu](https://UASData.USC.edu).

<sup>†</sup> **Survey Error:** Factors other than sampling error may affect results of any survey, including question wording, question order, mode or sample type (e.g. opt-in panels vs. probability panels such as UAS), population coverage, impact of current events, and differential participation decisions by subgroups of respondents. In addition, results of questions asked in an internet panel may obtain different results compared to similar questions asked by other polling firms using phone interviewers. Sampling error calculations are at the 98% confidence level.

## About the Understanding America Study Internet Panel

The Understanding America Study (UAS) is an ongoing national research panel that started in 2014. We recruit study members in waves using household addresses obtained from Marketing Systems Group frames which cover all zip codes in the United States. To ensure full coverage of the U.S. population, we provide internet-connected tablets to households that were not already online. Our panel includes U.S. residents who have cell phones, landlines, or no phone at all. Study members are compensated for their participation.

For more information about the UAS panel, including weighting details; panel sampling procedures; recruitment protocols, survey and recruitment response rates; panel attrition rates; panel management protocols; and microdata files (including nonresponse and paradata), please visit the Understanding America Study panel website at [UASdata.usc.edu](https://UASdata.usc.edu).

## About the Center for Economic and Social Research

The Center for Economic and Social Research (CESR), part of the USC Dornsife College of Letters, Arts and Sciences, conducts basic and applied research in economics, psychology, demography, education, and sociology. The center's name signifies the breadth of the research, which encompasses numerous disciplines, topics and methodologies. The Center's multi-disciplinary philosophy fosters a productive and innovative research environment focused on understanding and informing important societal issues. It is led by economist and online panel expert Arie Kapteyn, founding director of the CentERpanel in the Netherlands, the oldest existing probability Internet panel in the world, as well as the RAND American Life Panel before he moved on to create CESR.

## About the Center for the Political Future

The mission of the USC Dornsife Center for the Political Future is to advance civil dialogue that transcends partisan divisions and explores solutions to our most pressing national and global issues. The Center is led by two of the nation's most experienced and respected political experts, Robert Shrum and Michael Murphy.

Shrum is the Carmen H. and Louis Warschaw Chair in Practical Politics at USC. He has a storied career as an author and campaign adviser to Democratic candidates. His numerous clients included Edward Kennedy, Joe Biden, John Glenn, and Barbara Mikulski in their Senate campaigns, and John Kerry and Al Gore in their presidential races.

Murphy is one of the Republican Party's most successful political consultants. Murphy has led more than 20 statewide campaigns to victory, including gubernatorial races for Jeb Bush, Mitt Romney, Arnold Schwarzenegger, Christine Todd Whitman, John Engler, and Tommy Thompson as well as dozens of Senatorial, United States House, and other races.

## CESR Dornsife Daybreak Poll Team

**Jill E Darling** is Survey Director of the poll, and for the Understanding America Study at CESR

**Arie Kapteyn** is Professor of Economics and the Executive Director of CESR

**Tania Gutsche** is CESR's Managing Director and Study Manager of the Understanding America Study

**Bas Weerman** is CESR's Director of Information Technology

**Erik Meijer** is a CESR Econometrician, and sampling/weighting statistician

**Ying Liu** is a CESR Statistician

**Jarred Cueller** and **Oskar Müller** are CESR Research Assistants

For questions about this survey, please contact [uas-l@usc.edu](mailto:uas-l@usc.edu)

**The USC Dornsife Center for Economic and Social Research is a proud member of the American Association for Public Opinion Research's [Transparency Initiative](#).**

The survey is funded by the USC Dornsife College of Arts, Letters and Sciences and additional funding from research grants.

Data embargoed until Thursday November 19, 2020 3:00am Eastern

Survey field dates November 4 – 15, 2020

## This document is the Crosstabs Release

This document, and the poll’s crosstabs and questionnaire, are provided at [bit.ly/USCPolls](https://bit.ly/USCPolls) and at [UASdata.usc.edu](https://UASdata.usc.edu) where data may also be downloaded.

**Reading the tables:** These tables include weighted percentages, unweighted sample sizes, and margins of sampling error. It is important to note that our two-stage weights account for both UAS sample design and post-stratification to Census benchmarks, so unweighted subgroup sample sizes provided in these tables may not be representative of the proportion the subgroup represents in the estimated result. Please refer to the poll’s topline document or questionnaire for full question wording.

**Panel Methodology:** Visit [UASdata.usc.edu](https://UASdata.usc.edu) for detailed information about the Understanding America Study probability-based internet panel, including methodology, sampling, weighting, recruitment procedures, response rates, and to obtain access to data files.

**Contact:** Jill Darling, Survey Director for the USC Center for Economic and Social Research’s Understanding America Study ([uas-l@usc.edu](mailto:uas-l@usc.edu))

*Questions asked among UAS panel members who are U.S. residents unless otherwise indicated. Results are weighted percentages and unweighted observation frequencies. Tables that result in sample sizes of fewer than 100 respondents are suppressed.*

## 1. Feeling about the Country and the Election

pe002: Generally speaking, do you feel that the country is headed in the right direction, or is it off on the wrong track?

**interfere\_foreign:** What number would you choose to represent how likely it is that election fraud or interference in the election by individuals, groups or officials in other countries changed the outcome of the U.S. presidential election? Please select a number on the scale below from 0 to 100 where 0 means you are certain that the outcome was not changed and 100 means you are certain the outcome was changed.

*Likelihood that foreign interference changed outcome*
